

TEST PENTRU ADMITEREA IN CLASA A V-A ENGLEZA INTENSIV
PROBA ORALĂ – ETAPA 1

MODEL SUBIECT 3

Read the following text and answer the questions:

In Australia, there is a type of animal called a marsupial. Marsupials carry their babies in a pouch and feed them milk.

A

The Koala is one of Australia's cutest animals, but it's not a bear! Koalas live in eucalyptus forests and eat the leaves from the trees. They have their babies from September to March and carry them in their pouch for six months.

B

You can see kangaroos everywhere in Australia. They usually live in family groups. Kangaroos eat grass and leaves. Baby kangaroos are very small, about the same size as your thumb!
